

Microsoft OneDrive is a cloud-based storage service that allows a user to access files from any device with an Internet connection. Discover how to store and share documents, spreadsheets, and other files with Microsoft OneDrive. This means a user can share files with others within the organization as well as external users. Files stored on OneDrive can be edited in the Office Online applications and can even be co-authored by multiple users at once. See how to get started with OneDrive and learn how to upload, organize, copy, and delete files. Learn about how to view photos in elegant galleries and slideshows, share files using links and the public folder, locate specific files, and create documents with Microsoft Office Online. Get quick answers to your most pressing questions. Learn how to be more productive and collaborative with OneDrive including access to your documents from anywhere, any device, any browser, any time. Discover how to upload and locate files and folders in OneDrive, share files and folders with internal and external colleagues, including managing file versions, change sharing options, access and change file versions, sync files to the desktop, restore files, use OneDrive on mobile devices and more. Students will also learn to work with Version History, delete files, and sync files.
